Projects & Experience

Lost and Found WebApp — Team Leader, Full-Stack Developer

- Led a 3-member team to develop a web application for lost-and-found management.
- Designed user, staff, and admin workflows for reporting, tracking, and archiving items.
- Built scalable full-stack architecture, improving accountability in schools and workplaces.

E-Commerce Website — Project Leader, Frontend Developer

- Directed frontend development of an eyewear e-commerce site with product variants and dynamic dropdowns.
- Built intuitive browsing experience with responsive product displays.
- Ensured project security by limiting backend exposure during development.

Ordering System Application — UI/UX Designer

- Designed and implemented UI/UX for a canteen ordering system using Flutter.
- Optimized navigation flow for easy ordering; ensured clear, user-friendly layouts.

DaMath Educational Game — Frontend 3D Designer

- Created interactive 3D chessboard and themed assets in Blender.

- Focused on engaging visual design to enhance the learning experience.

Basic Banking System — Solo Developer

- Developed a local banking application using Visual Basic & MySQL.
- Implemented full CRUD operations for account and transaction management.
- Simulated secure account handling for educational use.
